

Every Machine in Your Plant Runs on Lubrication.

Machinery Lubrication Conference & Exhibition is for maintenance and reliability professionals like you, who are responsible for keeping plants running.

October 27-28, 2026

Tulsa, OK • Renaissance Hotel

70% of equipment failures are linked to improper lubrication practices.
According to OEM component manufacturers and industry research

Choose a Learning Path

Take critical skills and strategies back to your plant.

20+ Sessions on In-Demand Topics

- ✓ High-Performance Lubricants
- ✓ Lubrication Program Management
- ✓ Sensor-Based & AI-Driven Lubrication
- ✓ Oil Analysis, Onsite & Laboratory
- ✓ Leadership in Lubrication

Led by Industry Leaders & Plant Professionals

Certification Training

Training content provided by Noria, globally trusted by leading organizations. Get certification-ready for two ICML credentials, GLC and LAT, at no additional cost. Available only to Machinery Lubrication Conference & Exhibition Attendees.

Can Your Plant Afford for You Not to Be There?

Unplanned downtime costs the average industrial plant roughly \$125,000 per hour. Two days in Tulsa could be the difference between catching that risk early, or learning about it the hard way. Source: ABB 2023 Value of Reliability survey
